

PEACOCK

PRECISION SEEDER

RETROFIT YOUR AIR SEEDER
FOR ONE PASS SEEDING

FIELD TESTED RESULTS

A

5.5" long-lasting cast chrome seed shoes allow for evenly spaced 1" seed rows. Peacock custom designed wear wings provide an undisturbed shelf for perfect seed to soil contact and the ability to function in clay soils.

B

The rubber cushioned bushing allows for lateral flex necessary for moving around rigid obstructions.

C

Fully adjustable seed depth control.

D

Two rubber packing wheels running on quality sealed bearings are spaced to pack each of the two rows of seed providing excellent soil to seed contact.

The precision seeder design puts the seed in a paired row with the ability to double shoot NH3, liquid or dry fertilizer. The fertilizer is placed up to 2" below & 2" beside the paired row.

- ▲ The precision seeder attachment can easily be attached to any heavy duty cultivator with a 400lb. or more trip.
 - ▲ No holes or welding necessary.
 - ▲ Chrome seed shoes are easily replaced by undoing one bolt.
- ▲ If the cultivator shank trips, the seeding attachment can pivot to avoid striking the cultivator frame.
- ▲ The spacing options will be determined by your existing cultivator, with up to 15" shank spacing.
 - ▲ Everything is supplied for easy attachment to your existing air seeder or cultivator.
 - ▲ Fully adjustable seed depth control.
- ▲ The seeder shoe is continuously self-adjusting to maintain perfect seed depth control.

The unique knife and seed shoe combination disturbs just enough soil to help warm the seeded rows for germination. Our paired row system prepares the ground for easier seed root access to the fertilizer deposit before the weeds, thus early crop domination pushing weeds aside for cleaner, healthier crops.
